

## **Overview**

The NC115 IP Camera provides an effective and reliable IP surveillance system with state-of-the-art IP network cameras for professional indoor security surveillance and remote monitoring.

With the installation of a networked surveillance system, you can locally or remotely monitor the safety and security of people and property anywhere, anytime. Networked surveillance makes it possible to send live images and audio for remote monitoring, learning, troubleshooting, web broadcasting, and any other activity requiring a remote presence.

The NC115 provides remote monitoring over a local area network or the Internet using a standard Web browser. It is an ideal choice for securing offices, shops and other facilities.
